EXAMINER'S AMENDMENT Am dt/poff

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- in figures 1 and 2, should have been labeled –PRIOR ART--;
- in claim 40, on line 4, "fiber core end a core contour" should changed to -- fiber core end has a core contour--, on line 5, "and said cladding" should changed to -- and said fiber cladding--;
- in claim 42, on line 4, "fiber core end a core contour" should changed to -- fiber core end has a core contour--, on line 5, "and said cladding" should changed to -- and said fiber cladding--; and
- in claim 48, on line 1, "The method for of claim 47" changed to --The method of claim 47--.

The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the figures 1 and 2 should labeled --PRIOR ART--. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Application/Control Number: 10/686,934

Art Unit: 2874

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

A fiber Fabry-perot filter comprising:

- a first reflective surface formed at a first optical fiber end having a fiber core end and a fiber cladding end, wherein said fiber core end has a core contour profile and said fiber cladding end has a cladding contour profile, wherein said core contour profile is a concave contour profile and said cladding contour profile is different from said core contour profile; and
- a second reflective surface positioned a selected distance from the first optical fiber end, thereby forming a Fabry-Perot resonance cavity between said first reflective surface and said second reflective surface.

The Kropp reference and Imada et al reference discloses the fiber core end has a core contour profile, but does not discloses the underline limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
